April 29th, Tuesday 4-8 PM

Spirit Night: Fuddruckers

Monthly Objectives

English Language arts (ELA): This month the students will study Eric Carle's illustration and writing style. The students will also create graphic organizers from story read aloud in order to deepen their comprehension and create statements based on those diagrams which will cover science objectives. High Frequency Words: one out about my by now how put went sew make take eat

Math: Students will justify their reasoning for the selection of a strategy to solve addition and subtraction word problems.

Science: Students will observe the basic parts and life cycle of plants. Students will also notice living animals and identify their basic needs.

Social Studies: Students will explore examples of the effects of technology on how people live and work. Students will begin to explore similarities and differences among families: the characteristics families have in common and others that may distinguish one family from another. Students will also study and practice decision-making skills and applying them to an appropriate topic or question.

Class Notes

This month we will be learning about oviparous animals. After learning which animals are oviparous your child will pick the one they are more interested in. Keep your eyes open for more details regarding our new IIM project.

Our class is still in need for more treasure box items. Please send any extra party favors you may have.

Show and Tell

Week 1 Mar. 31 st - Apr. 4 th	What is your favorite technology? Why is it your favorite? Draw a picture or bring it in.
